

# ZL strain relief plates

for screw assembly

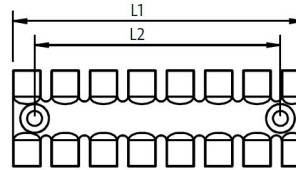

The strain relief plate ZL is used for static or dynamic applications for organising and securing cables on machines, control panels or drag chains.

The design of the strain relief unit provides secure strain relief according to EN 62444. Mount of the cables or pneumatic tubing is easily done using cable ties.

By using aluminium (ZL-AB types) or brass (ZL-MS types) nuts for the screw holes, a better fit of the strain relief plate is achieved, even in high vibration environments.

Strain relief plates ZL 03 | 04 | 05 feature different comb widths. Thus providing a multi-purpose product for various cable sizes.

For multilayer installation please use [DH spacers](#).
